

Mathematics Mondays Webinar Series

2019-2020
Free for all school and district staff!

Please join us for this virtual meeting seminar, free and easy to participate!
All you need is a computer, laptop, or device with speakers!
Please pre-register at : <https://bit.ly/2MKkNWP>

<p><u>Instructional Design</u> <u>Principles in Mathematics</u> November 18, 2019 2:30-3:30pm EST</p>	<p>Instructional Design can be considered the "Science" of instruction because it uses real data to continually design instruction to meet the students where they are, while keeping in mind the learning targets that will eventually lead them to become proficient mathematicians.</p>
<p><u>Writing a Quality Math IEP</u> January 13, 2020 3:00-4:00pm EST</p>	<p>What assessments can I give to get data for the PLP? What types of math goals should I be writing for my students? What is the progression of math skills that my students need to be successful? Join us as we answer these questions and more.</p>
<p><u>Teacher Delivery Methods in Mathematics</u> February 3, 2020 3:00-4:00pm EST</p>	<p>Teacher delivery methods are the art of teaching because it requires us to deliver content in such a way that learning is meaningful, pleasurable, and memorable, stimulating, informative and provides the right amount of challenge. We can agree that there is an art to this because though we have hard data to rely on we also have the human factor of our student audience that requires a deep understanding and flexibility in our craft.</p>

Logging in is Easy!

From the comfort of your classroom or office! Starting 15 minutes before the start time, click the link to enter the Adobe Connect Virtual Room.
